Dear Mr. President,

As the Co-Chairs of the Problem Solvers Caucus, we lead a bipartisan group of nearly 50 Members of the House of Representatives focused on finding common ground on the key issues facing our nation. We meet regularly to discuss opportunities for bipartisan compromise and to develop legislation that both parties can agree on and vote for. In that spirit, we are writing to request a meeting with you to discuss three issues where we see both the opportunity and the need for comprehensive bipartisan solutions: immigration, permitting reform, and the national debt.

Immigration: Your Administration took immediate action to secure our southern border, driving the numbers of illegal crossings to historic lows. We thank you for restoring order to the border, and we believe you deserve credit for delivering on this campaign promise. But there is still more work to do. It will take bipartisan legislation to permanently secure the border, fix the overwhelmed asylum system, and ensure that essential workers in fields like agriculture, healthcare, and hospitality can continue to contribute to our economy. We all agree the immigration system is broken — let's work together to find a lasting solution.

Permitting Reform: Our outdated permitting system delays crucial infrastructure and energy projects that we need to compete globally, slowing our country's growth and raising energy costs. We need to cut red tape and make it easier and faster to build in America. Both parties acknowledge this problem and are ready to solve it. We came close to a comprehensive permitting reform deal at the end of the 118th Congress, and we are confident we can find a way to get to yes this time around.

National Debt: You have made fiscal responsibility one of your top priorities — and for good reason. Our national debt poses a long-term threat to our economy, forcing potentially devastating cuts to programs like Social Security and Medicare and leading to higher taxes. While cutting wasteful spending is a start, we will need to take a comprehensive look at both sides of the balance sheet — spending and revenue — in order to solve this problem. We propose establishing a fiscal commission: a bipartisan, bicameral group of lawmakers and experts working together to develop a plan to stabilize our nation's finances. By acting responsibly now, we can avoid even tougher decisions in the future.

The American people are tired of gridlock in Washington. They want Republicans and Democrats to work together to solve problems. We look forward to the opportunity to meet with you to discuss how we can deliver the bipartisan solutions our country wants and needs.

Sincerely,

Brian Fitzpatrick (R-PA)
